

## Introduction

[Procol.AI](#) is a Series A, B2B AI startup, backed by tier one VCs like Blume Ventures, Peak XV Surge, Beenext, GMO and Rainmatter. 100K+ enterprises still run billions of dollars in procurement via email+excel. [Procol.AI](#) is an AI-powered procurement platform managing \$20B+ procurement spend for 100+ enterprise customers, including >10% of NIFTY50 companies, delivering 10-20% savings through process optimization and technology adoption. Procol is the Oracle/SAP for the next trillion dollars of procurement.

## Hiring for Implementation Intern

At Procol, an Implementation Intern plays a key supporting role in ensuring smooth customer onboarding and successful platform adoption. You will work closely with the Implementation team to understand client requirements, assist in project execution and contribute to delivering a seamless onboarding experience.

This role is ideal for someone who is eager to learn, enjoys solving operational challenges and wants hands-on exposure to how SaaS implementations work for enterprise clients.

**Work Location:** Gurgaon, Haryana

## What you will do:

- **Support Implementations:** Assist the team in managing post-sales onboarding processes, from kickoff to go-live, ensuring timely execution of tasks.
- **Understand Client Requirements:** Work with senior team members to gather and document customer requirements, workflows, and use cases.
- **Project Coordination:** Help track implementation timelines, update project plans and coordinate with internal teams (Product, Engineering, Customer Success.)
- **Stakeholder Communication:** Support client communication by preparing updates, notes, and follow-ups during the onboarding phase.
- **Process Assistance:** Identify inefficiencies in workflows and contribute ideas to improve onboarding processes, templates and documentation.
- **Customer Enablement Support:** Assist in preparing training materials, product walkthroughs, and documentation for customers.

- **Feedback Collection:** Capture customer feedback and implementation insights to help improve product and processes.
- **Data & Reporting:** Help maintain dashboards, trackers and reports to monitor implementation progress and success metrics.

## What would you bring to the table:

- Currently pursuing or recently completed a degree in Business, Engineering or a related field.
- Strong interest in SaaS, project management or customer-facing roles.
- Good communication and interpersonal skills.
- Highly organized with attention to detail.
- Problem-solving mindset and willingness to learn in a fast-paced environment.
- Basic understanding of tools like Excel/Google Sheets; familiarity with project management tools is a plus.
- Ability to work collaboratively across teams.

## Why you will love Procol AI

At Procol AI, we believe our employees are our greatest asset. We offer a dynamic work environment that fosters creativity, collaboration, and growth. Benefits include:
